Market Cap

Hancock Horizon Funds Burkenroad Small Cap Fund

Inception Date: December 31, 2001

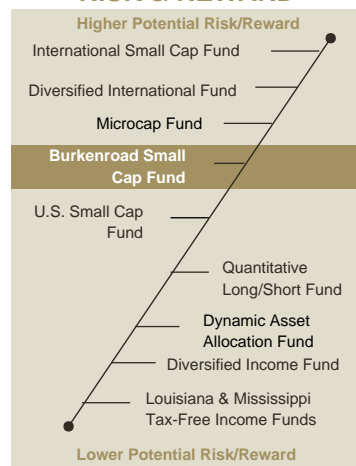

WHY INVEST IN HANCOCK HORIZON FUNDS?

To prepare for a future that's nearer - and probably more costly - than you think, you need financial power close at hand. The Hancock Horizon Family of Funds may help you bring financial goals from every stage of your future within your grasp - whether you're planning a home improvement project in a few months, a college education for your children in a few years, or your retirement down the road.

FUND OBJECTIVE

The Fund seeks capital appreciation by investing primarily in common stocks of companies with small capitalizations located or doing business in Alabama, Florida, Georgia, Louisiana, Mississippi, and Texas. The Advisor intends to utilize Tulane University's Burkenroad Reports as a source of research and analysis in its investment decision making.

RISK & REWARD

VALUE OF \$10,000 INVESTMENT - INVESTOR CLASS

Assumes initial investment of \$10,000 occurred on the Fund's inception date.

Hancock Horizon Funds: NOT FDIC INSURED • NO BANK GUARANTEE • MAY LOSE VALUE

There are specific risks inherent in investing primarily in small cap companies. Smaller companies typically have a higher risk of failure and historically have experienced a greater degree of volatility. Please read the prospectus carefully to obtain a complete understanding of the risks.

Carefully consider the Funds' investment objectives, risks, charges and expenses before investing. This and other information, including performance, can be found in the Funds' summary or full prospectus, which may be obtained by visiting <http://www.hancockhorizon.com/FundInvestors/> or by calling 1-800-990-2434. Please read the prospectus carefully before you invest or send money.

Mutual fund investing involves risk, including possible loss of principal. Current and future holdings are subject to risk. There is no guarantee the fund will achieve its stated objective.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. HHBUX, HYBUX and HIBUX were rated against 625 Small Blend funds over a three-year period, 537 funds over a five-year period, and 377 funds over a ten-year period. With respect to these funds, HYBUX, HHBUX and HIBUX all received a rating of 2 stars for the three-year period, 3 stars for the five-year period and 5 stars for the ten-year period. Past performance is no guarantee of future results.

The Russell 2000 Index is a capitalization weighted index which is comprised of 2000 of the smallest stocks (on the basis of capitalization) in the Russell 3000 Index. Representing approximately 10% of the Russell 3000 total market cap, this is a small cap index. Index returns do not reflect any management fees, transaction costs, or expenses. It is not possible to invest in an index. For more information, please see current fund prospectus or your financial advisor.

Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index
