Hancock Horizon Funds Quantitative Long/Short Fund

Inception Date: September 30, 2008

WHY INVEST IN HANCOCK HORIZON FUNDS?

To prepare for a future that's nearer - and probably more costly - than you think, you need financial power close at hand. The Hancock Horizon Family of Funds may help you bring financial goals from every stage of your future within your grasp - whether you're planning a home improvement project in a few months, a college education for your children in a few years, or your retirement down the road.

FUND OBJECTIVE

The Fund seeks long-term capital appreciation by taking long and short positions in equity securities of publicly traded companies in the U.S. primarily included in the S&P Composite 1500 Index. Using a quantitative model developed by the Adviser, the Fund buys stocks "long" that it believes are undervalued relative to their peers, and sells stocks "short" that the Adviser believes are overvalued relative to their peers.

RISK & REWARD

VALUE OF \$10,000 INVESTMENT - INVESTOR CLASS

Assumes initial investment of \$10,000 occurred on the Fund's inception date.

TOTAL RETURN (as of 03/31/2017)

Carefully consider the Funds' investment objectives, risks, charges and expenses before investing. This and other information, including performance, can be found in the Funds' summary or full prospectus, which may be obtained by visiting <http://www.hancockhorizon.com/FundInvestors/> or by calling 1-800-990-2434. Please read the prospectus carefully before you invest or send money.

Mutual fund investing involves risk, including possible loss of principal. With short sales, you risk paying more for a security than you received from its sale. Current and future holdings are subject to risk. There is no guarantee the fund will achieve its stated objective.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. HHQAX, HHQTX and HHQCX were rated against 166 Long/Short Equity funds over a three-year period and 81 funds over a five-year period. With respect to these funds, HHQAX and HHQTX received a rating of 4 stars for both the three-year and five-year periods. HHQCX received a rating of 3 stars for the three-year period and 4 stars for the five-year period. Past performance is no guarantee of future results.

The S&P Composite 1500, a combination of the S&P 500, S&P MidCap 400, and S&P SmallCap 600 indices, provides a broad representation of the entire U.S. market, representing 87% of total U.S. equity market capitalization. Index returns do not reflect any management fees, transaction costs, or expenses. It is not possible to invest in an index. For more information, please see current fund prospectus or your financial advisor.

Lipper Alternative Long/Short Equity Index - Funds that employ portfolio strategies combining long holdings of equities with short sales of equity, equity options, or equity index options. The funds may be either net long or net short, depending on the portfolio manager's view of the market.
