

OPPORTUNITY COMES IN ALL SIZES.

WHY MICROCAPS?

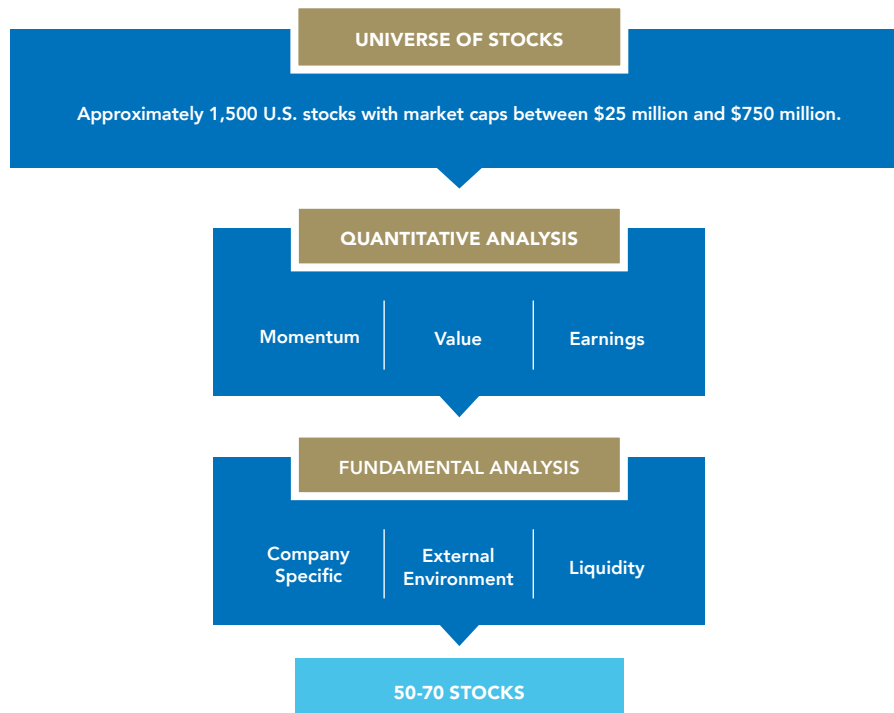

Microcap stocks, similar to small cap stocks, are investments in companies with small market capitalizations that generally are under-covered by analysts and the media. Because of this, inefficiencies, mispricings and overlooked opportunities often exist that can provide large growth potential for investors. When actively managed, these stocks can help contribute to the long-term success of your portfolio.

ADVANTAGES OF MICROCAPS

- Outperformed other equities over long time periods (*Fama and French, 12/31/2014*)
- Can exhibit lower correlations (*Morningstar, 12/31/2014*)
- Under-covered by analysts and the media, often leading to market inefficiencies
- Often disproportionately benefit from positive developments and takeover bids
- Small cap managers may have difficulty investing in this space without positions becoming too large

WHY THE HANCOCK HORIZON MICROCAP FUND?

The Hancock Horizon Microcap Fund aims to capitalize on microcap market inefficiencies by using quantitative and fundamental analysis to identify a portfolio of stocks we believe may help maximize returns for investors. See below for a summary of our investment process.
